EDUCATION

Vellore Institute of Technology – VIT-AP

B.Tech, Computer Science & Engineering – CGPA: 8.76

Amaravati, India

2021 – 2025

EXPERIENCE

Lauren IT

AI Engineer

Mumbai, India

Jun 2025 – Present

AI Engineering Intern → AI Engineer (converted Aug 2025)

- Own the procurement workstream inside a live 5-agent supply-chain automation platform (Automation Anywhere), managing an enterprise client's order lifecycle from intake through resolution
- Designed and shipped 2 production LLM tools spanning retrieval-augmented generation (RAG) and cloud-cost automation, carrying each from prototype to client-ready deployment
- Leverage LLMs (Groq, Ollama) for natural-language reporting, summarization, and conversational client interfaces
- Partner directly with clients on requirements and solution architecture; use Kiro and Figma to prototype full frontends in under 5 minutes via AI-assisted rapid development
- Apply human-in-the-loop feedback and vector search to continuously raise retrieval speed and output quality across deployed systems

Prodevans (in association with Red Hat)

Intern – ETL

Remote

Oct 2023 – Dec 2023

- Completed a hands-on internship covering ETL (Extract, Transform, Load) concepts and pipelines

PROJECTS

Multi-Agent Supply Chain Platform | *Python, Automation Anywhere, FastAPI, Gmail API, ERP*

Lauren IT – NDA

- Co-architected a 5-agent system (Procurement, Vendor, Orchestrator, Inventory, Logistics) automating the SCM order lifecycle end-to-end for an enterprise client
- Personally owned the Procurement Agent's reporting layer end-to-end – on-demand generation across 2 output formats (Word, Excel), LLM-driven conversational pre-send edits, and automated email dispatch
- Integrated Automation Anywhere RPA with 3 external systems (Gmail, Calendar, ERP), removing manual hand-offs between teams

Multi-modal RAG Application | *Python, LangGraph, LangChain, Groq, Vector Search*

Lauren IT

- Indexed 4 content types (text, PDF, image, JSON) for natural-language querying with cited, context-aware, multi-hop answers across large document sets
- Built the retrieval and orchestration pipeline combining vector embeddings with Groq-backed low-latency inference and a human-in-the-loop feedback loop for continuous quality improvement
- Delivered a production-ready system with full conversation context retention and citation surfacing on every response

Clothing Attribute Descriptor | *Python, Ollama, Gemma3:4B, OpenCV, openpyxl*

Internal Tool

- Deployed a local Ollama Gemma3:4B vision-language model to extract 6 structured attributes per garment image – color, type, model, collar, sleeve, demographic
- Exported results to a clean Excel report enabling offline cataloguing with zero cloud dependency or API cost

Virtual Trial Room | *Python, OpenCV*

- Built a camera-based try-on tool that layers selectable shirt, pants, and shoe images onto a live camera feed to preview outfit combinations

AWS Credit-Burn Guardrail | *Python, boto3, AWS CloudWatch, Ollama*

- Automated a daily credit-usage check that samples AWS spend at boot, midday, and end-of-day, triggering an email/notification alert when usage exceeds a set threshold so a runaway service can be stopped

WhatsApp Hotel Room-Service Bot | *Python, Twilio API, LLM*

- Built a conversational ordering bot that delivers an itemized order list and generated bill over WhatsApp via Twilio

Book & Goals Tracker

In progress: mobile port

- Built a personal tracker for books read/wishlisted and ongoing goals; porting from local app to mobile

TECHNICAL SKILLS

AI / LLM: LangChain, LangGraph, RAG, Prompt Engineering, Groq, Ollama, MCP, Multi-Agent Systems, Vector Databases (FAISS, Pinecone, ChromaDB), Hugging Face Transformers, LLMops & Model Evaluation

Automation & Cloud: Automation Anywhere (RPA / AI Agent Studio), AWS, Azure, GCP, API Integration, Docker

Frameworks & Tools: Python, SQL, FastAPI, Flask, Git, Kiro, Figma, AI-assisted frontend development, CI/CD

Exploring: LoRA / QLoRA fine-tuning, Apache Spark, DynamoDB, tool calling, distributed load balancing (in progress, personal project)

CERTIFICATIONS

Databricks Certified Machine Learning Associate – Databricks

Jun 2026 – Jun 2028

Automation Anywhere Certified – Agentic Process Automation – Automation Anywhere

2026

AI Automation Engineer Certification – Automation Anywhere (exam cleared; certificate in process)

2026

Anthropic Education – Claude Code in Action, Building with the Claude API, Intro to MCP, Agent Skills

Jun 2026

Complete Generative AI Course with LangChain and HuggingFace – Udemy

Jun 2025

Prompt Engineering PRO (ChatGPT & Generative AI Fast-Track) – Udemy

Jun 2025

SAP Basis Course – Willsys Infosystems

Jun 2024 – Oct 2024
